Availability: mornings · Curricular internship (UB agreement)

PROFILE

Computer Engineering student at the University of Barcelona and co-founder/CTO of WRDB, a native iOS AI-powered virtual-wardrobe app. I build real product end to end: an app in **Swift/SwiftUI** live on the App Store, a serverless backend on **Supabase** and **Cloudflare Workers**, a web front in **Next.js**, and **applied AI** through **MCP** and **Claude Code**. I'm looking for a curricular internship (mornings) where I can bring real shipping experience and keep growing as a software engineer.

EXPERIENCE

Co-founder & CTO — WRDB (WRDB SCP)

Barcelona · May 2025 – present

B2C native iOS virtual-wardrobe app powered by AI, delivering personalized outfit recommendations and closet organization.

- Lead full-stack development and product design from concept to **App Store** launch.
- Build the native app in **Swift** and **SwiftUI** following Clean Architecture (Domain → UseCases → Data → Presentation).
- Design and implement the serverless backend with **Supabase** (PostgreSQL, Auth, Edge Functions) and **Cloudflare Workers**.
- Integrate **applied AI**: computer-vision models for clothing recognition and styling recommendations.
- Develop with an **AI-assisted workflow (Claude Code)** and **MCP** integrations; product website in **Next.js**.
- Own the full product lifecycle: market research, user testing, and iterative agile methodology.

EDUCATION

BSc in Computer Engineering — University of Barcelona (UB)

September 2023 – June 2027 (expected)

Specialization in Software Engineering.

PROJECTS

- WRDB — AI virtual-wardrobe iOS app.** Swift, SwiftUI, Supabase, Cloudflare Workers, Next.js, computer vision. Own product live in production (App Store).
- Personal web portfolio — alexmatosolive.com** — collection of projects and GitHub repositories. (work in progress)

TECHNICAL SKILLS

Languages: Swift, Python, JavaScript/TypeScript, SQL

iOS / Mobile: SwiftUI, UIKit, Combine, Xcode, Clean Architecture, App Store / TestFlight

Backend / Data: Supabase, PostgreSQL, Edge Functions, REST APIs

Infrastructure / Web: Cloudflare Workers, Next.js

Applied AI: Machine Learning, computer vision, MCP (Model Context Protocol), Claude Code, LLM integration

Methods / Tools: Git, CI/CD, agile development, product design

LANGUAGES

Catalan — native **Spanish** — native **English** — professional/advanced (uncertified)
