Availability: mornings, curricular internship (UB agreement)

Profile

Computer Engineering student at the University of Barcelona (specialization in Software Engineering) and co-founder of WRDB, an iOS virtual-wardrobe app published on the App Store. I develop the product end to end (app in Swift and SwiftUI, backend on Supabase and Cloudflare Workers, and web on Next.js) and I am looking for a curricular internship (mornings) to contribute to iOS or full-stack development within a product team.

Experience

Co-founder & CTO, WRDB (WRDB SCP)

Barcelona · May 2025 – present

iOS virtual-wardrobe app: users catalogue their wardrobe and get outfit recommendations.

- Develop the native iOS app in Swift and SwiftUI, from app design to release and maintenance on the App Store.
- Build and maintain the serverless backend on Supabase (PostgreSQL, authentication, Edge Functions) and Cloudflare Workers.
- Implement clothing recognition and styling recommendations with computer-vision models in Core ML, integrated with cloud AI services.
- Develop the product website in Next.js.
- Own the product end to end: technical decisions, iteration with real users, and shipping new releases.

Education

BSc in Computer Engineering, University of Barcelona (UB)

September 2023 – June 2027 (expected) · Specialization in Software Engineering

Projects

- **WRDB:** virtual wardrobe for iOS, live on the App Store. Swift, SwiftUI, Core ML, Supabase, Cloudflare Workers, Next.js.
- **Portfolio & repositories:** alexmatosolive.com · github.com/amatosolivework

Technical skills

Languages: Swift, Python, TypeScript, SQL

iOS development: SwiftUI, Combine, Core ML, Xcode

Backend & infrastructure: Supabase (PostgreSQL, Edge Functions), Cloudflare Workers, Next.js

Applied AI: computer vision with Core ML, integration of cloud AI services and LLMs

Tools: Git, CI/CD, AI-assisted development (Claude Code, MCP)

Languages

Catalan: native · **Spanish:** native · **English:** professional/advanced
